WILL WITNESS EXHIBIT. Prof. Bell to Entertain Geographic So-

ciety With Tetrahedral Kites. In addition to the annual field excursions of the National Geographic Society for the spring season, there will be short excursions to points of interest about the District. The first of these, to be given tomorrow, will take the form of an examination of prehistoric flint quarries in the District of Columbia, under the guidance of Prof. William H. Holmes. The members of the society and their guests will meet at 2:30 o'clock at the Piney Branch bridge, on 14th street extended. They will then be conducted to the site of the old Indian quarries on what is now the Argyle estate, where the extensive quarrying operations of the aborigines will be explained by Prof. Holmes. The privilege of visiting the site and examining the excavations has been courteously extended to the members of the society by Mr. Blagden, the owner of the estate.

The afternoon of Saturday, April 30, there will be a field excursion to Columbia, Va.. beyond Arlington, where Dr. Alex. Graham Bell will exhibit several small models of his tetrahedral kites at the kite station of the United States weather bureau, which has been placed at the service of the soclety through the courtesy of Prof. Willis L. Moore, chief of that bureau. The society has arranged for several spe-cial cars, which will leave the Virginia end of the Aqueduct bridge, 36th street, at 2:30 sharp. At Columbia station the members will leave the cars and walk down the hill to Mr. Potter's house, the kite station. The special cars are reserved exclusively for the members of the society and their guests, and only the tickets issued by the society will admit to the cars. Tickets can be obtained at Hubbard Memorial Hall, 16th and M streets.
In case of heavy rains, the meeting be postponed until Saturday, May 7.
